#### **DETAILED ACTION**

## Request for Continued Examination

- 1. The request filed on October 18, 2007 for a Request for Continued Examination (RCE) under 37 CFR 1.53(d) based on parent Application No. 10/777,563 is acceptable and a RCE has been established. An action on the RCE follows.
- 2. In view of the amendment filed October 18, 2007, the non-compliance issue is moot.
- 3. In view of the amendment filed October 18, 2007, claims 3, 9 have been cancelled. Claims 1, 2, 4-8, 10-14 are pending.

#### Claim Rejections - 35 USC § 112

- 4. The following is a quotation of the second paragraph of 35 U.S.C. 112:
  The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 5. Claims 1, 2, 4-8, 10-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 (line 6), the recited chemical structure are considered indefinite. How can the recited "L element" possesses four bonds when Y and Z possess only three bonds.

10/777,563 Art Unit: 1796

As recited in claim 1, L, Y, and Z is a Group 15 element. Is there any thing missing, a charge maybe?

$$R^{3}$$
  $L$   $R^{1}$   $Y$   $R^{6}$   $R^{3}$   $R^{2}$   $R^{2}$   $R^{7}$   $R^{7}$ 

### Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000.

10/777,563 Art Unit: 1796

Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

7. Claims 1, 2, 4-8, 10-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Sugimura et al. (JP 10-330412), English translated.

Sugimura et al. (page 4, claim 1) disclose a catalyst substantially identical to the catalyst as claimed. Further, Sugimura et al. (page 66, 0199) disclose a polymerization process comprising olefins and the catalyst described. Sugimura et al. (page 66, 0200) disclose that the polymerization process is a solution or suspension polymerization process. Since Sugimura et al. contain all the features of claims 1, 2, 4-8, 10-14, claims 1, 2, 4-8, 10-14 are anticipated. In view of the 112 rejection set forth, the instant rejection is proper.

8. Claims 1, 2, 4-8, 10-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Sugimura et al. (JP 10-330416).

Sugimura et al. (page 9, 0067) disclose a catalyst substantially identical to the catalyst as claimed. Further, Sugimura et al. (page 28, 0172) disclose that the polymerization process is a solution or suspension polymerization process. Since Sugimura et al. contain all the features of claims 1, 2, 4-8, 10-14, claims 1, 2, 4-8, 10-14 are anticipated. In view of the 112 rejection set forth, the instant rejection is proper.

10/777,563 Art Unit: 1796

9. Claims 1, 2, 4-8, 10-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Imuta et al. (WO 98/34961).

Imuta et al. (abstract) disclose an olefin polymerization process comprising a catalyst that is substantially identical to the catalyst as claimed. Further, Imuta et al. (abstract) disclose that the polymerization process is a slurry process with aliphatic or alicyclic hydrocarbon. Since Imuta et al. contain all the features of claims 1, 2, 4-8, 10-14, claims 1, 2, 4-8, 10-14 are anticipated. In view of the 112 rejection set forth, the instant rejection is proper.

10. Claims 1, 2, 4-8, 10-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Imuta et al. (US 6,255,419).

Imuta et al. (abstract) disclose an olefin polymerization process comprising a catalyst that is substantially identical to the catalyst as claimed. Further, Imuta et al. (col. 80, line 27-32) disclose that the polymerization process is either a liquid phase polymerization process including solution polymerization and suspension polymerization, or gas phase polymerization. Since Imuta et al. contain all the features of claims 1, 2, 4-8, 10-14, claims 1, 2, 4-8, 10-14 are anticipated. In view of the 112 rejection set forth, the instant rejection is proper.

Art Unit: 1796

#### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William K Cheung whose telephone number is (571) 272-1097. The examiner can normally be reached on Monday-Friday 9:00AM to 2:00PM; 4:00PM to 8:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David WU can be reached on (571) 272-1114. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
